PROJECTS

Linked-Up-Media | MERN Stack Social Media Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Clerk, Inngest, Tailwind CSS, Cloudinary

- Developed a full-stack social media platform using the **MERN Stack** with a responsive and modern user interface.
- Implemented secure user authentication and authorization using **Clerk Authentication**.
- Built core social features including **posts, stories, likes, user profiles, connections**, and **one-to-one** messaging.
- Integrated **Cloudinary** for efficient image upload, storage, and management.
- Automated story expiration using **Inngest** background functions, deleting stories after 24 hours without affecting application performance.
- Designed and developed **RESTful APIs** with Express.js and MongoDB (Mongoose) for scalable backend operations.

GreatBlog. | MERN Stack Blogging Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary, JWT Authentication

- Developed a full-stack blogging platform using the **MERN Stack** with a clean, responsive, and user-friendly interface.
- Implemented **JWT-based authentication** and role-based authorization for secure user and admin access.
- Built a complete blog management system with Create, Read, Update, and Delete (CRUD) functionality.
- Integrated **Cloudinary** for efficient blog thumbnail image upload and storage.
- Designed **RESTful APIs** using Express.js and MongoDB (Mongoose) for scalable backend operations.
- Developed an **admin dashboard** to manage blogs, categories, users, and published content.
- Implemented search, category filtering, and recent posts features to enhance content discovery.

ACHIEVEMENTS & HACKATHONS

- Participated in a national-level hackathon and developed a Service Provider platform connecting clients and workers
- Presented research paper on "Role of AI in Startup Innovation" at National Conference (ICAET - 2026), organized by Buddha Institute of Management
